For details, please refer to each school's website.

Mission Statement of the Nisshinkyo Business Japanese Language Program

This program's mission is to certify that the listed registered Japanese language schools meet the educational standards and criteria set forth by the Nisshinkyo Business Japanese Language Program.

It is also our objective that students attending the approved schools will acquire competency in both Japanese language and cultural knowledge necessary to meet the needs of Japanese companies, both in Japan and in international markets.

Registered Schools Requirements

Japanese language schools registered in this program will serve as a model for those planning to apply for certification in the future.

Registered schools are required to maintain the quality of their program described in Section 5 (Student Evaluation) and Section 10 (Program Evaluation) of the Nisshinkyo Business Japanese Language Program Criteria.

Registered schools shall maintain their quality of education by submitting annually the required reports.

Evaluation Measures

Student Evaluation: Registered schools will use their own forms for student evaluation.

Program Evaluation: Registered schools will submit the NBJ Self-Evaluation Report listed below.

For evaluating students enrolled in an independent Japanese business course, refer to “Sample Achievement Levels” and “Can-Do Statements” on the Japanese homepage.
